Re: Compliance Status Report
WT Docket No. 01-309
HAC Digital Wireless Telephones

Dear Ms. Dortch:

Buffalo-Lake Erie Wireless Systems Co., L.L.C. ("BLEW"), hereby files its compliance status report in response to the Commission's Hearing Aid Compatibility *Report and Order*.¹

As background, BLEW is a small wireless carrier licensed to provide commercial wireless service in Western New York and Northwestern Pennsylvania pursuant to six broadband Personal Communications Services ("PCS") licenses.² BLEW acquired these licenses in December 2003 and launched commercial operations in August 2004. As of this writing, BLEW has approximately 11,700 subscribers. BLEW purchases its handsets from Brightpoint, Inc. and other third party distributors and has limited ability to influence product development or selection, and must rely instead on the range of commercially available products provided.

In the light of the foregoing, BLEW hereby reports the following in response to Commission requirements:

¹ *Section 68.4(a) of the Commission's Rules Governing Hearing Aid-Compatible Telephones*, Report and Order, 18 FCC Rcd 16753 (2003).

² See Call Signs KNLG725, KNLG727, KNLG728, KNLG730, KNLG731, and KNLG735.

- **Item 1 – Digital Wireless Phones Tested:** BLEW is not a manufacturer, and does not purchase phones directly from vendors. Hence, to date, BLEW has not tested any digital wireless telephones for HAC-compliance.
- **Item 2 – Laboratory Used:** None. *See* Response to Item 1.
- **Item 3 – Test Results for Each Phone Tested:** Not applicable. *See* Response to Item 1.
- **Item 4 – Identification of Compliant Phone Models and Ratings According to ANSI C63.19:** At present, BLEW sells the makes and models of digital CDMA wireless handsets listed below. BLEW has been informed by its distributors that all of these handsets meet a U3 rating under ANSI Standard C63.19. BLEW has also identified below the handsets it offers that meet the inductive coupling “T-Coil” requirements for hearing aid compatible phones:

<u>Handset Model</u>	<u>Compliance Rating</u>
Samsung SCH-a870	M3/T4
Motorola RAZR V3m	M3/T4
Nokia 3587	M3
LG 125	M3
Motorola v265	M3
Motorola V3c	M3
Kyocera KX9	M3
Kyocera KX16	M3

- **Item 5 – Report on the Status of Product Labeling:** BLEW sells manufactured handsets that display the U-rating and information of the U-rating is provided in the packaging of the handsets as required of manufacturers under section 20.19(f).
- **Item 6 – Report on Outreach Efforts:** BLEW works with hearing impaired customers in its retail stores to select a phone most suitable to their needs. BLEW will continue and expand these efforts as phones meeting the U3 rating under ANSI standard C63.19 become commercially available.

- **Item 7 – Information Related to Retail Availability of Compliant Phones:** BLEW sells its HAC-compliant handsets at its retail outlets. Handsets not in stock can be ordered from Brightpoint or shipped from another BLEW retail location.
- **Item 8 – Information Related to Incorporating Hearing Aid Compatibility Features Into Newer Models of Digital Wireless Phones:** BLEW anticipates the incorporation of HAC features into newer models of digital wireless telephones will be accomplished by the manufacturers of CDMA handsets.
- **Item 9 -- Any Activities Related to ANSI C63.19 or Other Standard Intended to Promote Compliance with the Requirements of the Commission's *Report and Order*:** None.
- **Item 10 – Total Numbers of Compliant and Non-Compliant Phone Models Offered as of the Date of this Report:** As referenced above, BLEW currently sells eight models of wireless phones. To its knowledge, all of these meet a U3 rating under ANSI Standard C63.19 and two of these models meet the inductive coupling “T-Coil” requirements
- **Item 11 – Any Ongoing Efforts for Interoperability Testing With Hearing Aid Devices:** BLEW has performed no interoperability testing to date, and will continue to rely on the phone manufacturers for all testing.

Respectfully submitted,

Buffalo-Lake Erie Wireless
Co., L.L.C.
